

LEADERS IN ORACLE eAM CERTIFICATION

EAM Masters, LLC has developed two Oracle eAM Certification Programs each with a variety of training options and a two-tiered certification exam. The EAM Master program is designed for the Oracle eAM user, while the EAM Planner program has less emphasis on set-up and configuration. A Steering Committee of respected leaders in the Oracle eAM community from large, asset intensive organizations have carefully guided EAM Masters through the development of these exam. Thoroughly designed for the expert-level user or planner, the exams incorporate both knowledge and practical assessments.

The knowledge component is comprised of 100 multiple choice questions and will take approximately 2 hours to complete. **The practical** portion of the exam requires the student to utilize the software and complete tasks within an eAM test instance. This portion may take up to 4 hours to complete depending on the user. Students must complete and pass the knowledge component before being allowed to attempt the practical portion.

All exams are proctored and offered anytime online or as an onsite option at various times throughout the year (Oracle events). Student verification and information security, as well as certification validation remain a top priority throughout the entire process. The certification test is validated against Oracle E-Business Suite R12.1.3 and graded on a standard rubric established by the Steering Committee. Results and certification documentation is available and sent in a timely and secure manner.

Who Should Become Certified

Certification is for any experienced Oracle eAM User or Planner interested in gaining a competitive advantage. The process of achieving and maintaining certification helps ensure the individual is continually improving and refining their knowledge and skills. Oracle eAM Certification holders gain credibility and continuous learning advantages.

Exam Requirements

- Oracle eAM Customer
- Extensive knowledge of Oracle eAM Product
- Able to access EAM Masters' Test Environment
- Computer with High-speed Internet Access
- Browser requirements – Windows Internet Explorer 9
- Java Version 7 update 67 (1.7.0_67)

“While Certification is not required in this field, it certainly adds validation to an individual’s skill set and can be a determining factor for promotions or contracts. It’s a value added criteria that can set a person apart from other candidates.”

- Human Resources
