

LEADERS IN ORACLE eAM

TRAINING . IMPLEMENTATION . CERTIFICATION . ASSESSMENT . SUPPORT

OVERVIEW

EAM Masters, LLC is the world's leading provider of *cloud-based* Training, Implementation and Certification Programs for Oracle Enterprise Asset Management (eAM). Our unique expert-led, online process is the most efficient and cost-effective way for maintenance intensive organizations to fully implement Oracle eAM and busy professionals to truly master the application. With consultants skilled in both eAM and maintenance, we incorporate Asset Reliability best practice into everything.

EAM MASTER SCORECARD™

The EAM Master Scorecard™ is an inexpensive way to gauge how well your organization or site is getting full and productive use out of Oracle eAM and it's integration with other EBS modules. It also includes a simple Maintenance Maturity Score™ that measures the extent to which your organization is using maintenance "best practices". Recently evaluating 30 plus companies using this system, we now have a robust database of scores and data to benchmark your company against. The EAM Master Scorecard™ is the only true benchmark for Oracle eAM.

Who Needs a Scorecard™?

Any maintenance organization interested in improving their overall use of eAM and their maintenance practices and anyone that wants to know where they stand compared to the rest of the eAM community would benefit from completing a Master Scorecard™. For accurate results and rankings, representatives from every department directly effected by eAM (IT, maintenance, scheduling, etc.) should be involved in the assessment.

"Our mission is to enable people and companies to fully utilize the capabilities of Oracle eAM as a means to improve maintenance performance."

LEADERS IN ORACLE eAM ASSESSMENT MASTER SCORECARD™

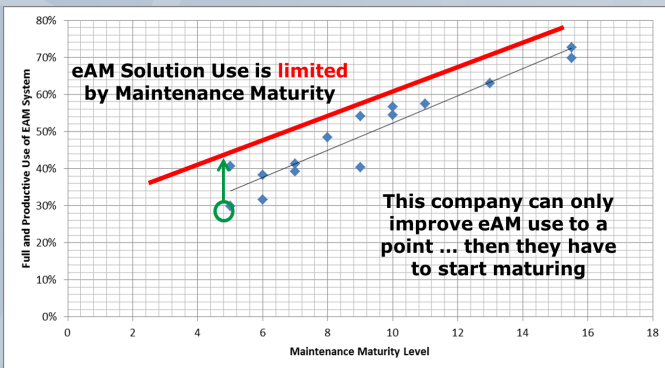

Get the Results

The tangible results include scores in 32 functional areas of Oracle eAM, an overall composite score, comparisons to industry averages and recommendations for improvement in 9 different areas. For each criteria, a scorecard is developed and weighted by *importance* in order to calculate an overall composite score and to compare them to industry standards. These scores are incorporated into the EAM Masters' assessment process and categorized by an **Oracle eAM Score** and a **Maintenance Maturity Score™**. Delivered in a PDF format, an

EAM Masters consultant will review and explain these results via live web meetings to help highlight challenges and achievements, establish a baseline for improvements, show

"How well is your organization getting "full and productive use of Oracle eAM? How do you compare to other organizations in the same industry? What are your most challenging areas? What are the best companies doing?"

Get these and other answers with a Master Scorecard™

and compare to the industry standards and define high-level goals with specific recommendations for achievement.

Self Assessment - Online, survey to self assess an organization's maintenance practices and current use of Oracle eAM.

Basic - Private, 1-3 hour, expert-led online survey with discussions of analysis, comparisons and recommendations.

Standard (w/Validation Reporting) - Private 2-4 hour web meeting with thorough investigations and validations of maintenance practices and eAM use. Detailed analysis, comparisons and recommendations with full discussion of results.

Premium - Onsite Assessment - Onsite, 2-3 day investigation with thorough interviews and observations. Customized to the needs of individual organizations with detailed analysis, comparisons and recommendations with full discussion of results with documentation.
